[LeetCode](#) | [Codeforces](#) | [CodeChef](#) | [AtCoder](#)

Education

PES University

B.Tech in Computer Science and Engineering

Bengaluru, KA

Aug. 2023 – Aug. 2027

- **Coursework:** Data Structures and Algorithms, Operating Systems, Computer Networks, DBMS, Machine Learning, Advanced Algorithms, Graph Theory, System Design.

Experience

Google Developer Groups on Campus

Mentor

Bengaluru, KA

Jan. 2026 – Present

- Mentored 50+ students on Git workflows, software engineering fundamentals, data structures, algorithms, and project development practices.
- Led technical sessions and code reviews that helped participants ship cleaner full-stack projects with stronger maintainability and debugging habits.

Prime Intellect – Community Environments

Open Source Contributor

Remote

Oct. 2025 – Present

- Built a VirtualBox codebase-search RL/evaluation environment for LLM agents, adding 630 prompts, evaluator logic, rollout artifacts, and documentation across 8 files.
- Contributed benchmark proposal and contributor documentation for a Pydantic codebase-search environment, defining task format, evaluation signals, and implementation plan.

Selected Projects

CPBoard – University CP Leaderboard | [Next.js](#), [TypeScript](#), [PostgreSQL](#), [Prisma](#) | [GitHub](#) | [Live](#)

- Built a verified university leaderboard that aggregates Codeforces, LeetCode, AtCoder, and CodeChef profiles into global and university-specific rankings.
- Implemented .edu magic-link auth with NextAuth/Resend, Prisma data models, cross-platform heatmaps, rating charts, and Vercel cron syncs running every 6 hours.

KubeDataGuard – Data Consistency SLO Operator | [Python](#), [Go](#), [Kubernetes](#) | [GitHub](#)

- Designed a research prototype that checks correctness of Postgres-derived views across Redpanda/Kafka, OpenSearch, Redis, and ClickHouse using declarative invariants.
- Implemented existence, aggregate, freshness, and query checks with evidence reports, compact CRD status, repair workflows, Prometheus metrics, and kind/Compose demos.

Technical Skills

Languages: C++, Python, TypeScript, JavaScript, Go, SQL, HTML/CSS

Frameworks: Next.js, React, Node.js, FastAPI, Tailwind CSS, Prisma, NextAuth.js

Tools: Git, Docker, Kubernetes, Linux, Vercel

Data Systems: PostgreSQL, Kafka/Redpanda, OpenSearch, Redis, ClickHouse

ML/Data: PyTorch, TensorFlow, pandas, NumPy, OpenCV, Matplotlib

Achievements

- **Alogomania 3.0 Winner:** Won a 12-hour inter-college competitive programming contest with 4 rounds.
- **Competitive Programming:** Solved 500+ verified problems across Codeforces, LeetCode, and CodeChef; participated in 30+ rated contests across CF, LeetCode, CodeChef, and AtCoder.
- **Platform Highlights:** LeetCode 227 accepted problems and 1535 contest rating; Codeforces max rating 1106; CodeChef provisional rating 1274 with Global Rank 2055 in Starters 210.
- **Hackathons and Academics:** Secured Top 10 at Terrathon 3.0; received the Distinction Award Certificate twice for outstanding academic performance.
